

The Morphin Grid Universe

Founding Charter: the studio, the people, the partners and the villain behind a live-action Power Rangers shared universe built on the Marvel Studios blueprint.

Decision	Pick
First film release	Summer 2013: Friday, August 23, 2013 (20th anniversary)
Franchise name	The Morphin Grid Universe (MGU)
Big Bad of Phases 1–3	Dark Specter, Grand Monarch of Evil
Saga name	The Zordon Saga
Production studio	Command Center Studios
Franchise lead	Judd “Chip” Lynn, President of Command Center Studios
Distributor	20th Century Fox
Eventual acquirer	The Walt Disney Company

Scope note: This charter covers the franchise's foundations only. No films are planned, titled or slated here; the film slate gets built later.

STANDING MANDATE

100% faithful to the source. Nobody gets nerfed.

- Every Ranger, Zord, villain and mentor appears at the full power the show established. Weaker versions don't get approved.
- Zords are full-scale, building-sized war machines, and Megazord combinations follow the transformation sequences from the show.
- Zordon is the interdimensional being trapped in a time warp, as established. He isn't a face in a wall that someone shrank down for convenience.
- Villains keep their actual feats. If Rita can make monsters grow from the Moon, she does it on screen.
- Canon outcomes stay canon. We won't rewrite a source-accurate ending so a hero gets a cleaner win.

DECISION 01

What's the right year for the first film?

Summer 2013: Friday, August 23, 2013

Mighty Morphin Power Rangers premiered on August 28, 1993. Opening the weekend before its 20th anniversary makes the launch an event for the original audience, who are now in their late twenties and early thirties and buy tickets.

The timing works on the business side too. In 2010, Haim Saban bought the brand back from Disney, which gives a three-year development window, about the same runway Marvel Studios had between financing its own slate and releasing *Iron Man*. By 2013, *The Avengers* had already shown audiences would show up for a shared universe, and VFX had matured enough to put full-scale Zords and Megazords on screen without shrinking them.

DECISION 02

What's the franchise called?

The Morphin Grid Universe (MGU)

The Morphin Grid is the source of every Ranger's power in the show's canon. It's the one thing that connects every team, every era and every power coin, crystal and key. Naming the universe after it puts canon in the title and leaves room for every generation of Rangers, the same way "Marvel" covers every hero.

DECISION 03

Who's the Big Bad of the first three phases, and what's the saga called?

Dark Specter, Grand Monarch of Evil. The saga is called The Zordon Saga.

Dark Specter is the closest thing Power Rangers has to Thanos, and the source material puts him there. He sits at the top of the United Alliance of Evil, the coalition that includes Rita Repulsa, Lord Zedd, the Machine Empire, Divatox and Astronema. Rita and Zedd answer to him. He captures Zordon and drains his power, which is what sets up the climactic *Countdown to Destruction*.

That gives us the MCU structure with no invention needed: the villain lurks behind the early threats, shows up in the shadows, and finally steps forward when the Alliance makes its move.

Saga name: fans already call the original run, from *Mighty Morphin* through *In Space*, the "Zordon era." It's Zordon's story, from his first message to his sacrifice. Calling it **The Zordon Saga** adopts the fanbase's own term and builds toward the moment the whole saga exists for: Zordon's energy wave, which wipes out the Alliance across the universe.

- **Faithfulness lock:** in canon, Dark Specter is killed when Darkonda betrays him. No Ranger beats him in single combat. That stays as written, and he isn't made weaker to give the heroes an easier fight.

DECISION 04

What's the production studio called?

Command Center Studios

The Command Center is where it all started: Zordon, Alpha 5, the viewing globe and the teleportation beams. Using its name tells fans the studio is built on the original show. It works for the brand the way “Marvel Studios” does, and it gives the studio a ready-made logo (the Command Center silhouette with the lightning-bolt morph). The studio runs as a production subsidiary of **Saban Brands**, the company Haim Saban set up in 2010 when he reacquired the property.

DECISION 05

Who leads the franchise, and what's their title?

Judd “Chip” Lynn, President of Command Center Studios

The Kevin Feige role needs someone who already understands the mythology from the inside, and Judd Lynn does. He was a producer and head writer at the end of the Zordon era, he led *Power Rangers in Space*, the season that ends the Zordon Saga with *Countdown to Destruction*, and he went on to run several later seasons, including *Samurai*, which launched under Saban's return. He would be adapting a finale he wrote himself.

Structure: as President of Command Center Studios, he gets final creative say on every film, keeps continuity across the universe and enforces the faithfulness mandate. He reports to **Haim Saban** (Chairman, Saban Brands), the co-creator who brought Super Sentai to America and owns the property.

DECISION 06

Who distributes, and who eventually buys the studio?

Distributor: 20th Century Fox. Acquirer: The Walt Disney Company.

20th Century Fox has the strongest historical claim of any major studio. Fox Kids aired the show from 1993, and Fox released both theatrical films, *Mighty Morphin Power Rangers: The Movie* (1995) and *Turbo: A Power Rangers Movie* (1997). The deal follows the Paramount–Marvel model: Fox distributes and markets, and Command Center Studios keeps creative control.

The Walt Disney Company is the natural buyer. It owned *Power Rangers* from 2001 to 2010, so this is a homecoming. In this timeline, Disney outbids Hasbro in **2018**, mirroring its 2009 purchase of Marvel, and its 2019 acquisition of 21st Century Fox then brings the distribution rights under the same roof. Command Center Studios continues as its own label under Disney, the way Marvel Studios did, and Lynn stays as President.
