

The Film Entry Template

Every Morphin Grid Universe film has to be presented with all of these sections, in one message and one PDF, before it's approved. No films have been created yet. This template sets the standard they'll be built to.

REQUIRED SECTIONS

Ten sections for every film

#	Section	What it has to cover
1	Title: real and decoy	The film's official title, plus the decoy production codename used on call sheets, permits and crew gear (per the Secrecy Protocol). The decoy can't hint at Power Rangers.
2	Whose film it is	The character, or team, the film and its franchise line belong to.
3	When and where it's set	Its place on the MGU master timeline (in-universe date or era) and its main settings, such as Angel Grove, the Moon or alien worlds.
4	What it's about	The premise and story overview.
5	Villain / antagonist	The main threat, with their canon powers and feats shown at full strength.
6	Post-credits scenes	How many there are (mid-credits and end-credits), what each one shows, or a note that there are none.
7	Setting up the Big Bad	How the film plants, hints at or advances Dark Specter and the United Alliance of Evil.
8	Its own world-building	The settings, mythology, characters and rules this film introduces for its own story.
9	MGU world-building	What the film adds to the shared universe: crossover plot elements, settings, cast and characters that tie it to other films.
10	How it kicks everything off (first film only)	How the first film launches the whole MGU: the first threads of The Zordon Saga, the foundation for every later film, and the first moments fans will spot.

DELIVERY RULES

How each film is presented

- **All in one message.** Each film's full entry, with every section, arrives together in a single message, along with its PDF.
- **PDF only,** in the same Command Center Studios format as the rest of the development files, and eyes-only under the Secrecy Protocol.
- **Section 10 is only for the first film.** It's the one film whose job is to launch the whole universe.

This is a fictional, alternate-history development document created for creative purposes.
